# IBM FlashSystem® V9000:
Dimensions of Value 3

IBM FlashSystem® V9000 is a comprehensive all-flash enterprise storage solution. FlashSystem V9000 delivers the full capabilities of IBM FlashCore™ technology plus a rich set of storage virtualization features.

FlashSystem V9000 delivers industry-leading value to enterprises along three dimensions: Scalable Performance, Enduring Economics, and Agile Integration.

1   **2**   **3**

Scalable Performance

TAILOR STORAGE SOLUTIONS TO YOUR UNIQUE APPLICATION WORKLOADS WITH SCALABLE PERFORMANCE.

Enduring Economics

GAIN THE ENDURING ECONOMIC ADVANTAGES OF VIRTUALIZED FLASH FOR LESS THAN THE COST OF DISK.

Agile Integration

ACCELERATE YOUR TIME TO VALUE WITH THE AGILE INTEGRATION CAPABILITIES OF FLASHSYSTEM.

Fast
Optimize your infrastructure with scale-up, scale-out capabilities of fast FlashSystem performance.

Cost-Effective
Powerful virtualized storage enables you to realize immediate and long-term economic benefits.

Easy
Unlike conventional storage, FlashSystem is easy to deploy, can virtualize legacy systems, and delivers value in hours.

Value
Powered by IBM FlashCore™ technology, FlashSystem V9000 enables your business to realize the value of better decision-making driven by real-time insight and analytics.

It's About Time

Flash is realized. IBM FlashSystem V9000 performs better, costs less, and integrates more easily than any other enterprise storage solution.

IBM FlashSystem® V9000 delivers value into your unique data center environment through scalable performance, enduring economics, and agile integration.

Realize the value of FlashSystem now.
